ANKUR GUPTA

SENIOR SOFTWARE ENGINEER | RUBY ON RAILS | GOLANG | REACTJS

CAREER OBJECTIVE

Full stack engineer with 8+ years across Ruby on Rails, Golang and ReactJS, now working on cloud data platforms. I focus on scalable, efficient solutions – payments, authentication and high-volume event tooling – and on leaving codebases better than I found them.

EXPERIENCE

SENIOR SOFTWARE ENGINEER

May 2026 – Present

Pattern

- Contribute to Ruby on Rails, Golang and Python applications, reviewing changes and taking ownership of delivery.
- Work across the AWS data platform – Snowflake, Trino, Spark SQL, Apache Iceberg and Airbyte – building and maintaining data pipelines in Python and Golang.
- Monitor platform health and query performance with Grafana and Datadog, and apply Claude to accelerate development and code review.

STACK Golang · Python · Ruby on Rails · AWS · Snowflake · Trino · Spark SQL · Apache Iceberg · Airbyte · Postgres · Grafana · Datadog · Claude

APPLICATION DEVELOPMENT MODULE LEAD

Oct 2025 – May 2026

Telus Digital

- Led the maintenance and development of Ruby on Rails applications by resolving critical security and production issues and implementing key features.
- Defined technical requirements and guided architectural decisions to ensure stability, compliance and timely project delivery.

STACK Leadership · Golang · Ruby on Rails · ReactJS · JavaScript · TypeScript · GraphQL · Postgres · MySQL · GCP · Docker · Kubernetes

SENIOR FULL STACK ENGINEER

Oct 2022 – Oct 2025

Ticketmaster India – Universe.com

- Built features across the Universe.com live-events platform in Ruby on Rails and Golang, owning them from technical design through production release.
- Contributed to a major release by migrating from the legacy Stripe Charges API to the Payment Intent API for 3DS requirements in the Europe region.
- Implemented the Bulk Edit feature from scratch, allowing event hosts to modify ticket price, quantity, availability and timeslot capacity across many timeslots in one go.
- Implemented a major improvement to discount code configuration, letting hosts configure codes for specific dates, time ranges and selected days of the week.

Lucknow, UP, India

EDUCATION

M.Tech
Computer Science and Engineering

B.Tech
Computer Science and Engineering

TECHNICAL SKILLS

BACKEND
Ruby on Rails, Golang, Python, Spring Boot (Java), RESTful and GraphQL APIs

FRONTEND
ReactJS, Next.js, TypeScript, JavaScript, EmberJS, CoffeeScript

DATABASES
Postgres, MySQL, MongoDB, Redis

DATA PLATFORM
Snowflake, Trino, Spark SQL, Apache Iceberg, Airbyte

CLOUD & DEVOPS
AWS, Google Cloud Platform, Docker, Kubernetes, Helm, Jenkins, Heroku, Netlify

OBSERVABILITY
Grafana, Datadog

EXPERIENCE (continued)

Senior Full Stack Engineer, Ticketmaster India – Universe.com **(continued)**

- Successfully managed payment collection projects, ensuring timely delivery while optimizing system performance.
- Maintained clean, well-organized codebases with comprehensive test coverage.

STACK Golang · Ruby on Rails · ReactJS · JavaScript · TypeScript · GraphQL · MongoDB · Postgres · MySQL · GCP · Docker · Kubernetes

SENIOR SOFTWARE DEVELOPER

May 2021 – Oct 2022

Haptiq (Webonise)

- Led multiple frontend and backend projects, overseeing release management and collaborating with DevOps and QA teams to ensure timely delivery.
- Integrated OAuth 2.0 and OpenID Connect for enhanced authentication, delivering Single Sign-On across the NFHS suite of applications.
- Upgraded Rails from version 4 to 5 and then to 6, implementing security best practices using Brakeman and RuboCop.
- Implemented a major improvement to currency exchange and time zone handling for Teamed Global, generating multi-currency employee payrolls for multinational organizations.
- Customized the Active Admin panel for the NFHS Rulebook to streamline bulk administrative operations.

STACK Ruby on Rails · ReactJS · JavaScript · TypeScript · REST APIs · MongoDB · Postgres · MySQL · AWS · Jenkins · Heroku · Netlify · Docker

SOFTWARE ENGINEER

Mar 2019 – May 2021

AkaruiLabs India

- Developed deep expertise in Ruby on Rails and ReactJS, independently managing projects and collaborating directly with clients.
- Engineered crypto token exchange functionality from scratch for Zeehaus, built on the Stellar blockchain, alongside payment integrations via the Synapse API.
- Fixed major production bugs affecting song playback and score calculation on the Music Mayhem trivia game, and reworked the scoring logic to register points as the user begins typing.
- Conducted unit and user acceptance testing to ensure high-quality deliverables.

STACK Ruby on Rails · ReactJS · JavaScript · REST APIs · MongoDB · Postgres · Heroku

SOFTWARE ENGINEER INTERN

Mar 2018 – Feb 2019

Unihyr Labs Pvt Ltd

- Developed backend features for a Spring Boot application in Java.
- Built the corresponding ReactJS frontend, working across the full stack from API to user interface.

STACK Java · Spring Boot · ReactJS · JavaScript · REST APIs

TECHNICAL SKILLS (continued)

SECURITY & AUTH

OAuth 2.0, OpenID Connect, PCI DSS

AI TOOLS

Claude, Augment AI, GitHub Copilot, ChatGPT

TOOLING

Git, JIRA, Asana, ClickUp

CERTIFICATIONS

AMAZON WEB SERVICES

- Cloud Practitioner Essentials
- Well-Architected Framework
- IAM Management
- Auto Scaling
- Organizations and Roles

ENGINEERING

- Ruby on Rails 7.0 Essentials Training
- Building a GraphQL Project with ReactJS
- Go Complete Guide
- Learning Kubernetes
- PCI DSS Compliance

LEADERSHIP

- Practical Leadership Skills
- Leading and Working in Teams
- Time Management

ACHIEVEMENTS

- Performance recognition certificate at Ticketmaster
- Qualified GATE CSE 2019
